

# LifePath Retirement

Investment option summary as of March 31, 2019

The "LifePath Retirement" is one of a group of funds referred to as the Target Date Funds, each fund seeks to provide for retirement outcomes that investors on average may be willing to accept given a particular time horizon. Each fund utilizes a predetermined mix of specific asset classes with frequent re-balancing back to the fund's target allocation. One fund, "Retirement", does not include a number as it is designed for participants currently withdrawing their money. The number for example in "2020" is the approximate year a participant plans to start withdrawing their money. Each fund has a different asset allocation depending upon the year. As the year referenced in the fund nears, the asset allocation automatically becomes more conservative.

## OVERVIEW

<b>Ticker:</b>	N/A
<b>Inception:</b>	07/01/2003
<b>Issuer:</b>	SBERA Investment Committee
<b>Asset Class:</b>	Asset Allocation
<b>Category:</b>	Target-Date Retirement
<b>Benchmark:</b>	LifePath Retirement Index
<b>Turnover Ratio:</b>	12%

## INVESTMENT MANAGER

Performance quoted represents past performance and cannot guarantee future results. Current performance may be lower or higher than the performance shown. Investment return and principal value will fluctuate. An investor's shares, when redeemed, may be worth more or less than their original purchase price. Performance includes the reinvestment of dividends and capital gains. To obtain the most recent month-end performance, please visit [www.sbera.com](http://www.sbera.com).

The LifePath Retirement is being offered by SBERA solely to eligible participants, alternate payees and their beneficiaries. This investment option is not a registered investment company (i.e., mutual fund), does not have a ticker and is not being offered to the public generally. The Investment Committee of SBERA may allocate amounts to registered and non-registered investment entities in its sole discretion and reserves the right to change investment managers and/or the underlying investment entity at any time. The amounts allocated to investment managers and/or the underlying investment entity may vary by up to ten percentage points from targets in either direction before rebalancing occurs. This investment option may include allocations to money market instruments or indexes to provide the liquidity necessary to accommodate daily transactions. This information was prepared by NEPC, LLC and is taken from sources believed to be reliable, but is not guaranteed as to completeness or accuracy. Not FDIC insured.

## Glossary of Terms

---

**Beta:** A measure of a Fund's sensitivity to market movements (as represented by a benchmark index). The benchmark index has a beta of 1.0. A beta of more (less) than 1.0 indicates that a Fund's historical returns have fluctuated more (less) than the benchmark index. Beta is a more reliable

**R<sup>2</sup>:** A measurement of how closely the Fund's performance correlates with the performance of the benchmark index or equivalent. R<sup>2</sup> is a proportion which ranges between 0.00 and 1.00. An R<sup>2</sup> of 1.00 indicates perfect correlation to the benchmark index, that is, all of the portfolio's fluctuations are explained by performance fluctuations of the index, while an R<sup>2</sup> of 0.00 indicates no correlation. Therefore, the lower the R<sup>2</sup>, the more the fund's performance is affected by factors other than the market as measured by that benchmark index. An R<sup>2</sup> value of less than 0.5 indicates that the Annualized Alpha and Beta are not reliable performance statistics.

**Sharpe Ratio:** Arithmetic: The Sharpe ratio is a measure of historical risk-adjusted performance. It is calculated by dividing the Fund's excess returns (the Fund's average annual return for the period minus the 3-month "risk free" return rate) and dividing it by the standard deviation of the Fund's returns. The higher the ratio, the better the Fund's return per unit of risk. The three month "risk free" rate used is the 90-day Treasury Bill rate.

**Standard Deviation:** A measurement of how much a Fund's return varies over an extended period of time. The more variable the returns, the larger the standard deviation. A higher standard deviation indicates a wider dispersion of past returns and thus greater historical volatility. Standard deviation does not indicate how an investment actually performed, but it does indicate the volatility of its returns over time. Standard deviation is annualized.

**Gross Expense Ratio:** Expense ratio is a measure of what it costs to operate an investment, expressed as a percentage of its assets. These are costs the investor pays through a reduction in the investment's rate of return. The Gross Expense Ratio reported is the total annual Fund operating expenses paid over the prior fiscal year (before waivers or reimbursements).

**Turnover Ratio:** The lesser of amounts of purchases or sales of long-term portfolio securities divided by the monthly average value of long-term securities owned by the Fund. For Funds with multiple investment managers, this number reflects a weighted average of turnover from each manager's annual report.

## Benchmark Definitions

---

**90 Day Treasury Bills Index:** Refers to the Bank of America Merrill Lynch US Treasury Bill 3 Month Index which is comprised of a single issue purchased at the beginning of the month and held for a full month. At the end of the month, that issue is sold and rolled into a newly selected issue.

**Bloomberg Barclays U.S. Agg Bond Index:** Broad-based benchmark that measures the investment grade, U.S. dollar denominated, fixed-rate taxable bond market, including Treasuries, government-related and corporate securities, mortgage-backed securities (agency fixed-rate and hybrid adjustable rate mortgage pass-throughs), asset-backed securities, and commercial mortgage-backed securities.

**All Asset Custom Index:** A custom benchmark comprised of 40% Bloomberg Barclays US Aggregate, 30% Bloomberg Barclay's US TIPS, 10% S&P 500, 10% Bloomberg Barclay's High Yield, 10% JPM EMBI+ and the Consumer Price Index (CPI) + 5%. This Index cannot be directed invested in.

**Allocation Index:** Index rates of return for each asset class invested in by the Fund multiplied by the actual percent allocated to each asset class. It is designed to measure the success of the Fund's current allocation. The difference between the Allocation Index return and the SBERA Account's return measures the effect of active management.

**Russell 1000 Index:** Measures the performance of the large-cap segment of the U.S. equity universe. It is a subset of the Russell 3000 Index and includes approximately 1,000 of the largest securities.

**Russell 1000 Value Index:** The Russell 1000 Value Index measures the performance of the large-cap value segment of the U.S. equity universe. It includes those Russell 1000 companies with lower price-to-book ratios and lower expected and historical growth rates.

**Russell 1000 Growth Index:** The Russell 1000 Growth Index measures the performance of the large-cap value segment of the U.S. equity universe. It includes those Russell 1000 companies with higher price-to-book ratios and higher expected and historical growth rates.

**Russell 2000 Index:** Measures the performance of the small-cap segment of the U.S. equity universe. It is a subset of the Russell 3000 Index and includes approximately 2,000 of the smallest securities.

**Russell 2000 Value Index:** The Russell 2000 Value Index measures the performance of the small-capitalization value sector in the U.S. equity market, as index constituents are selected from the Russell 2000.

**Russell 2000 Growth Index:** The Russell 2000 Growth Index measures the performance of the small-capitalization growth sector in the U.S. equity market, as index constituents are selected from the Russell 2000.

**S&P 500 Index:** The S&P 500 Index is a widely recognized benchmark of U.S. stock market performance that is dominated by the stocks of large U.S. companies.

**Equity Custom Index:** This is a blended index representing the asset-weighted positions in the SBERA Defined Contribution Plan . It is currently comprised of 75% Russell 3000 Index and 25% MSCI EAFE Index. This Index cannot be directed invested in.

**MSCI EAFE (Europe, Australia, Far East) Index:** Measures global stock market performance, excluding the U.S. and Canada. The index consists of approximately 930 large-cap and mid-cap stocks from developed market countries.

**Russell 3000 Index:** The Russell 3000 Index measures the performance of the largest 3,000 companies in the U.S. equity universe. Large-cap, mid-, and small-cap companies are included.

**Bloomberg Barclay's US TIPS:** Includes the inflation-indexed securities within the Bloomberg Barclays U.S. Treasury Bond Index, which represents U.S. Treasury obligations with maturities of more than 1 year.

**Bloomberg Barclay's High Yield:** A multi-currency measure of the global high yield debt market. This index represents the union of the U.S. High Yield Index, the Pan-European High Yield Index, and Emerging Markets Hard Currency High Yield Index.

**Consumer Price Index (CPI) + 5%:** Represents is the change in the Consumer Price Index (CPI) plus 5% annualized. The Consumer Price Index is a measure of the average change over time in the prices paid by urban consumers for a market basket of consumer goods and services.

**JPM EMBI+:** The JP Morgan Emerging Markets Bond Index Plus (EMBI+) tracks total returns for traded external debt instruments in local currency of emerging markets.

**FTSE EPRA / NAREIT Developed Real Estate Index:** The FTSE EPRA/NAREIT Developed Index is designed to track the performance of listed real estate companies and REITS worldwide and represent general trends in eligible global real estate equities.

**Bloomberg Commodity Index SM:** Tracks prices of futures contracts on physical commodities on the commodity markets. The index is designed to minimize concentration in any one commodity or sector and is broadly diversified.
